

RAeS Hamburg in cooperation with the DGLR, VDI, ZAL & HAW invites you to a lecture

From Final Assembly to Delivery – The Flight Test of Production Aircraft at Airbus in Hamburg

Dipl.-Ing. **Joachim Illenberger**, MSc

Head of Flight Test Operations Hamburg, Airbus

Date: Thursday 16 January 2025, 18:00

Location: HAW Hamburg, Berliner Tor 5, Hörsaal 01.10 (in-presence only!)

The Airbus A320 Family has been one of the most successful airliner in the world for years. In 2023, 571 units were delivered to customers globally. The Hamburg production site plays a large part in this. During the approximately 15-day preparation phase before delivery to customers, the aircraft are put through their paces by a small team of test pilots, flight test and ground test engineers. Airbus flight test engineer Joachim Illenberger leads the flight test team in Hamburg and he also regularly takes part in test flights himself. In his lecture he presents the flight test program for the A320 Family.

- 1994 *Apprenticeship as a toolmaker (Junghans)*
- 1997 *Studies of Aeronautical Engineering (HAW Hamburg, Dipl. Ing. FH)*
- 2001 *Studies of Air Transport Management (Cranfield, MSc)*
- 2002 *Marketing Analyst at Airbus Commercial Aircraft (Toulouse)*
- 2006 *Flight Test Engineer Training (Airbus, EPNER, Toulouse)*
- Since 2019 *Head Of Flight Test Operations Hamburg, Airbus*
